6. The troops serving with the unit are armed with Russian rifles with square bayonets and Russian PPS machine carbines.
7. The torpedo station is located on the north coast in the vicinity of the old fortress. There is a small jetty in the area and a small building known as a "torpedo station". No torpedo exercises have ever been observed in the area but naval units from Pulj have been seen frequently tying up at the jetty. It is believed by informants that the "torpedo station" may be a torpedo store.
